**Marshalls**  
YOUR VEGETABLE AND FRUIT COMPANY

**CUSTOMER TRIAL FOR 2018**

**Pepper Gogorez**

**Jumbo sized beefsteak shaped peppers**

- ✓ **Strong, healthy, disease resistant plants**
- ✓ **Super sweet taste, perfect for slicing in salads, stuffing or roasting**
- ✓ **Weighs up to 300g**

Our exciting new variety reliably grows huge crops of jumbo-sized beefsteak tomato-shaped fruits. Each fruit weighs in at over 200g with some of our trial plants hitting close to 300g.

Pepper Gogorez will not disappoint – it is a strong, disease resistant plant with a superb root system and will produce huge crops of large fruits ready for you to enjoy.

This variety is compact with its thick stem and short internodes, making it perfect for those who are short on space. It is great for growing in a greenhouse or in a patio container that sits outdoors in a sunny location.

Gogorez will grow to approximately 1m (3ft) high and, due to the weight and the amount of the fruit produced, it will require some support.

The thick, fleshy-walled fruit will ripen from green to red with a fine, sweet (8-9% brix) flavour. It is perfect for slicing in salads, stuffing or roasting due to its flavour, due to its small and compact seed cavity.

## Here are our tips on sowing to picking your prize peppers!

We recommend you sow thinly 2cm (3/4in) deep in clean trays or individual modules filled with moist, firm compost. Place in warmth of 16°C (61°F) until transplanting.

We suggest transplanting Gogorez in May-June and place one plant for every 30cm (12in) pot with some cane supports for your pepper plants to climb and fruit abundantly.

Gogorez crops approximately 24 weeks from sowing and you will be able to start harvesting your peppers from July through to October. Please adjust the number of weeks required based on your location.

## Exhibit your heaviest fruit and win prizes of up to £75 by growing your free seed

For further information about joining the National Vegetable Society and entering your crops of Pepper Gogorez go to: [marshalls-seeds.co.uk/gogoreztrial](http://marshalls-seeds.co.uk/gogoreztrial)

## Tell us what you think of Pepper Gogorez

We would love to hear your feedback on Pepper Gogorez, our new trial variety which we are particularly excited about. Tell us your progress by either sending us your comments and images or by sharing how you are getting on via Facebook or Twitter using **#gogorez**.

Please fill in the following form on growing Gogorez and send back to us at **Marshalls Seeds, Alconbury Hill, Huntingdon, Cambridgeshire, PE28 4HY**.

You can alternatively email the form to: [gogorez@marshalls-seeds.co.uk](mailto:gogorez@marshalls-seeds.co.uk)
